

Every time  
I got a new pill  
pack, he'd flush  
them all down  
the toilet.

Violence and control can take many forms,  
and can cause unwanted or mistimed pregnancies.

Has anyone ever messed or tampered with your  
contraception to try and make you become pregnant?  
Do condoms seem to break often, or pills go missing?

Every woman should have the right to choose if and when she becomes pregnant. Some methods  
of contraception give you more control over your body, and are less able to be interfered with.

Discuss your options with a trusted doctor or a sexual health or family planning clinic,  
or visit our website for more information on all your contraception and pregnancy options.
